Summary

Computer Engineering student with a strong foundation in AI/ML, deep learning, and data science. Passionate about building intelligent systems and uncovering insights from data to solve real-world problems. Skilled in programming, machine learning frameworks, and analytical thinking.

Education

Bachelor of Engineering in Computer Engineering

Sept 2022 – May 2026

*C. K. Pithawala College of Engineering and Technology
Gujarat Technological University*

Surat, Gujarat

- **CGPA:** 8.11/10.0 (till 6th Semester)
- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Computer Architecture, Database Systems, Statistics & Probability, Python Programming, Linear Algebra

Experience and Training

Intel Corporation & Gujarat Technological University

Online

AI for Manufacturing Certificate Course

16 Weeks

- Comprehensive 16-week AI training program focused on manufacturing industry applications
- Collaborative initiative between Intel India and Gujarat Technological University, supported by GCCI
- Developed skills in AI integration for manufacturing processes and industrial automation
- Completed hands-on AI project with focus on manufacturing applications and real-world implementation
- Participated in live online training sessions and peer collaboration through official community platforms

Sardar Vallabhbhai Patel National Institute of Technology

SVNIT, Surat

Information Security Education & Awareness Bootcamp

1 week

- Secured 1st prize in Hackathon conducted by Department of Computer Science and Engineering
- Participated in Information Security Education and Awareness Phase III program
- Developed practical cybersecurity skills through hands-on exercises and assessments
- Gained expertise in security protocols, threat prevention, and information security best practices

Projects

Adversarial Training System | *Python, PyTorch, Streamlit, ART*

- Developed innovative AI security system strengthening models against adversarial attacks (FGM, PGD, CarliniL2, DeepFool)
- Implemented automatic model security enhancement with customizable security levels and performance visualization
- Created Streamlit-based UI for seamless model upload, training, and real-time performance monitoring
- Secured 1st prize in Department of Computer Science and Engineering Hackathon sponsored by MeitY

On-Device Medical Equipment Description Using LLMs | *Python, Streamlit, Phi-2 LLM, Text-to-Speech*

- Built offline desktop application leveraging fine-tuned Phi-2 LLM for medical equipment descriptions and interactive Q&A
- Developed comprehensive Streamlit interface with searchable dashboard, equipment detail pages, and chat functionality
- Implemented text-to-speech capabilities and offline functionality for healthcare environments without internet access
- Created custom medical equipment dataset and fine-tuned LLM for accurate, domain-specific responses

Technical skills

Programming Languages: Python, Java, C, SQL, PHP, Assembly

Technologies & Tools: TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Scikit-learn, Git, Jupyter Notebook, VS Code

Concepts & Domains: Artificial Intelligence, Machine Learning, Deep Learning, Neural Networks, Cloud Computing, Data Analysis, Statistical Analysis, Computer Vision, API, LLMs

Certifications

Machine Learning Specialization - Coursera, Stanford University

Neural Networks and Deep Learning - Coursera, DeepLearning.AI

Improving Deep Neural Networks - Coursera, DeepLearning.AI

Convolutional Neural Networks - Coursera, DeepLearning.AI

Structuring Machine Learning Projects - Coursera, DeepLearning.AI

Intel AI for Manufacturing Certificate Course - Intel Corporation & NITI Aayog

Information Security Education & Awareness Phase III - SVNIT, Surat
