EDUCATION

C. K. Pithawala College of Engineering and Technology

2022 – 2026

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.24

EXPERIENCE

PHP Developer Intern

Jan 2026 – Present

Jemistry Info Solutions LLP

Remote

- Developed full-stack PHP 8 and MySQL applications using MVC-inspired architecture with secure CRUD operations and responsive Bootstrap UI.
- Implemented authentication systems using PHP sessions, CSRF protection, bcrypt password hashing, and Google Authenticator based 2FA.
- Built analytics dashboards, reminder scheduling systems, and asynchronous AJAX workflows for real-time user interactions.
- Integrated PHPMailer SMTP services for email verification, password reset, and automated reminder notifications.
- Configured cron jobs for scheduled email reminders and improved application security using .htaccess and server-side validation.

PROJECTS

Job Application Tracker | *PHP, MySQL, Bootstrap 5, Chart.js, PHPMailer*

Jan 2026 – Present

- Developed a full-stack job tracking platform enabling users to manage applications, resumes, reminders, and interview timelines.
- Built secure authentication using PHP sessions, CSRF protection, bcrypt hashing, and Google Authenticator based 2FA integration.
- Designed analytics dashboards using Chart.js for application trends, stage breakdowns, and company-wise tracking insights.
- Implemented reminder scheduling with cron-job based automated email notifications using PHPMailer SMTP integration.
- Created Kanban-style application workflow supporting Wishlist, Applied, Interviewing, Offer, and Rejected stages.
- Structured the project using MVC-inspired architecture with reusable components and modular PHP development.

AI-Powered CCTV Surveillance for Industrial Safety | *Python, YOLOv8, OpenCV*

Apr 2025 – Jul 2025

- Built a real-time industrial safety monitoring system using YOLOv8 object detection for helmet, vest, and personnel detection.
- Developed a Streamlit dashboard supporting live webcam feeds, uploaded video analysis, image inference, and detection visualization.
- Integrated OpenCV based frame processing pipeline for real-time annotation, object tracking, and alert generation.
- Organized the application using modular architecture with separate inference, dataset, and training modules for maintainability.
- Trained and tested the model using construction site safety datasets for industrial compliance monitoring applications.
- Implemented responsive dashboard UI with animated components and real-time monitoring capabilities.

Online Library Management System | *PHP, MySQL, HTML, CSS, JavaScript*

Sep 2023 – Nov 2023

- Developed a web-based library management system supporting book issue/return workflows and student record management.
- Implemented complete CRUD functionality for books, students, and transaction records using PHP and MySQL.
- Designed relational database schema for handling library inventory, user information, and borrowing history.
- Built admin dashboard for managing books, student registrations, and issue-return operations efficiently.
- Added secure login functionality and form validation for reliable multi-user system interaction.

TECHNICAL SKILLS

Programming Languages: Python, PHP, JavaScript, Java, C, SQL, HTML5, CSS3

Frameworks & Libraries: Flask, Streamlit, Bootstrap 5, OpenCV, YOLOv8, Pandas, NumPy, Scikit-learn, Chart.js

Web Technologies: REST APIs, AJAX, JSON, MVC Architecture, CSRF Protection, Authentication Systems

Databases: MySQL

Developer Tools: Git, GitHub, VS Code, Postman

AI/ML: Computer Vision, Object Detection, NLP Basics, Model Training, Image Processing

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Responsive Web Design

CERTIFICATIONS

Intel AI for Manufacturing Certificate Course

Issued: July 15, 2025

Intel Corporation & NITI Aayog

Responsive Web Design Certification

Issued: Nov. 01, 2024

freeCodeCamp (300+ hours)

Python with Data Science

Issued: Sept. 27, 2024

Infosys Springboard

Basics of Python

Issued: July 27, 2024

Infosys Springboard
