EDUCATION

Gujarat Technological University

Bachelor of Engineering in Computer Engineering | CGPA: 8.24/10.0 (Till semester 7)

Surat, Gujarat, India

Sept. 2022 – May 2026

- **Institution:** C. K. Pithawala College of Engineering and Technology
- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Computer Architecture, Web Development, Database Management Systems, Statistics & Probability, Python Programming

EXPERIENCE & TRAINING

PHP Developer Internship

Jemistry Info Solutions LLP

Jan. 2026 – Present

Onsite

- Developed full-stack web applications using **PHP 8, MySQL with PDO**, and **AJAX**, implementing complete **CRUD operations** with role-based access control (RBAC) for Superadmin, Admin, and User roles
- Designed and deployed **JWT-based authentication and authorization system** for secure session management, replacing traditional session handling with token-based security
- Built **RESTful APIs** with complete CRUD functionality, integrated **2FA (Two-Factor Authentication)**, and implemented **forgot/reset password** using PHPMailer SMTP integration
- Enhanced web security by implementing **.htaccess rules**, WHOIS domain lookup via cURL integration, and collaborating with security team to identify and resolve **10+ security vulnerabilities**
- Automated database and project backup processes using **Cron jobs** with Google Drive integration, and implemented asynchronous AJAX operations for real-time user interactions on live and personal projects

AI for Manufacturing Certificate Course

Intel Corporation & Gujarat Technological University (NITI Aayog Initiative)

April 2025 – July 2025

Online

- Completed intensive 16-week AI training program focused on manufacturing industry applications, covering AI integration for industrial automation and process optimization
- Developed and deployed a real-time **AI-powered CCTV surveillance system** using YOLOv8 for safety compliance monitoring (helmet, vest, person detection) with Streamlit dashboard integration
- Participated in 50+ hours of live training sessions, collaborative peer learning, and hands-on project implementation with industry mentors from Intel India
- Gained expertise in computer vision pipelines, object detection frameworks, and deploying AI models for edge and cloud manufacturing environments

Responsive Web Design Certification

freeCodeCamp

Aug. 2024 – Nov. 2024

Online

- Completed 300+ hours of coursework covering modern HTML5, CSS3, responsive design principles, and accessibility standards (WCAG)
- Built 5+ hands-on projects including responsive portfolio website, product landing page, technical documentation page, and survey form with mobile-first design approach
- Implemented Flexbox, CSS Grid, media queries, and cross-browser compatibility techniques for scalable web layouts

PROJECTS

Job Application Tracker | PHP, MySQL, JavaScript, Bootstrap, 2FA, Cron Jobs

Jan. 2026 – Present

- Built comprehensive full-stack web application for tracking job applications across multiple companies with role-based access control (Superadmin, Admin, User permissions)
- Implemented **JWT authentication, 2FA verification system**, and secure password reset functionality using PHPMailer SMTP integration
- Designed relational MySQL database schema supporting application tracking, resume management, reminder scheduling, and analytics with optimized query performance
- Developed **automated analytics dashboard** providing real-time insights: application status visualization, success rate metrics, company-wise analysis, and timeline trends for better job search strategy
- Automated **Cron job backup system** with Google Drive integration, real-time email reminders for pending applications, and asynchronous AJAX operations with comprehensive admin dashboard

AI-Powered CCTV Surveillance for Industrial Safety | Python, YOLOv8, OpenCV, Streamlit

April 2025 – July 2025

- Engineered an end-to-end computer vision system to monitor industrial processes in real-time using CCTV footage for safety compliance enforcement
- Implemented YOLOv8 object detection model achieving **92% mAP** for detecting helmets, safety vests, and personnel in hazardous zones
- Designed interactive Streamlit dashboard for live video stream processing, alert generation, and compliance analytics with frame-by-frame annotation
- Reduced manual safety audits by **70%** through automated violation detection and real-time notification system for plant supervisors

Intelligent Chatbot for Academic Queries | Python, NLP, spaCy, Flask

Jan. 2024 – Mar. 2024

- Developed NLP-based chatbot to automate student query resolution for C.K. Pithawala College, reducing administrative workload by **60%**
- Trained intent classification model on 500+ labeled query-response pairs covering admissions, exams, facilities, and academic policies
- Implemented context-aware response generation using TF-IDF vectorization and cosine similarity matching with **85% query accuracy**
- Deployed Flask web interface with session management, achieving **200+ daily interactions** and avg response time under 2 seconds

Online Library Management System | PHP, MySQL, HTML/CSS, JavaScript

Sept. 2023 – Nov. 2023

- Built full-stack CRUD web application for library operations including book cataloging, student registration, and issue/return tracking
- Designed normalized MySQL database schema with 6 tables supporting 1000+ book records and managing concurrent transactions
- Implemented role-based access control (RBAC) for admin and student roles with secure authentication using password hashing (bcrypt)
- Optimized query performance with indexing, reducing book search time by **40%** and enabling seamless multi-user operations

Real-Time Weather Forecasting Web App | JavaScript, OpenWeather API, HTML/CSS

June 2023 – July 2023

- Created responsive web application providing real-time weather updates for 200,000+ cities using OpenWeather RESTful API
- Implemented dynamic city search with autocomplete, geolocation support, and 5-day forecast visualization using Chart.js
- Optimized API call efficiency with debouncing and local caching, reducing redundant requests by **50%** and improving UX responsiveness

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, PHP, C/C++, SQL, HTML/CSS

Frameworks & Libraries: Flask, Laravel, NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, YOLOv8, spaCy, Bootstrap

Databases: MySQL

AI/ML & Computer Vision: Machine Learning (supervised/unsupervised), Natural Language Processing, Object Detection, Image Processing, Model Evaluation & Tuning

Web Technologies: RESTful APIs, AJAX, JSON, Responsive Design, Cross-Browser Compatibility, MVC Architecture

Developer Tools: Git/GitHub, VS Code, Streamlit, Postman, NetBeans, Linux/Unix CLI

IoT & Hardware: Arduino, Bluetooth Module Integration, Sensor Data Processing

Soft Skills: Problem-Solving, Teamwork, Technical Documentation, Project Management, Agile Methodologies, Code Review

CERTIFICATIONS

Intel AI for Manufacturing Certificate Course <i>Intel Corporation & NITI Aayog</i>	Issued: July 15, 2025
Responsive Web Design Certification <i>freeCodeCamp (300+ hours)</i>	Issued: Nov. 01, 2024
Python with Data Science <i>Infosys Springboard</i>	Issued: Sept. 27, 2024
Basics of Python <i>Infosys Springboard</i>	Issued: July 27, 2024
